CALADIUM ESCULENTUM.

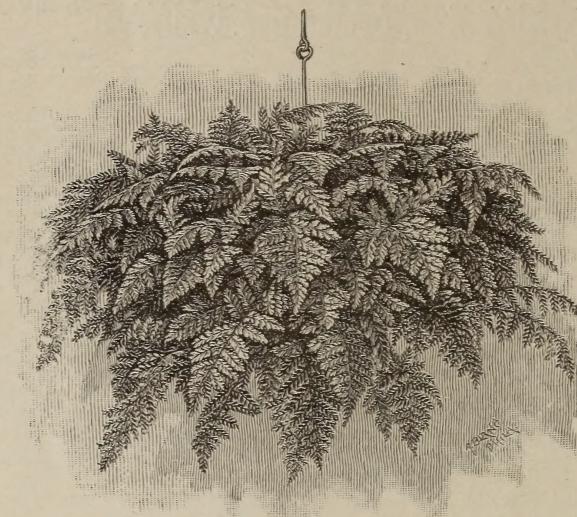

One of the most showy of ornamental foliage plants in cultivation, either for the conservatory or for planting out on the lawn; of easy culture and will grow in any garden soil. Leaves very large, of a green color, and beautifully veined and variegated with darker green. Plants should be abundantly supplied with water, which will produce a more luxuriant growth of leaves. In the autumn remove the roots to the cellar and pack in dry sand, out of the reach of frost. Every collection, however small, should contain at least one of these plants. For prices, see above.

JAPANESE FERN BALL IN LEAF.—18 to 24 inches across.

This little beauty from Japan is the finest addition to the Fernery yet introduced, and the most satisfactory house fern ever offered.

**FOR THE WINDOW, DRAWING ROOM, OR SUSPENDED FROM
CHANDELIER, OVER DINING TABLE, OR USED IN FERN DISHES.**

These Grand Novelties, importations from Japan, are certainly the finest additions to the Fernery yet introduced.

The Ball and Designs are composed of the Japanese Island Fern Roots and Sphagnum Moss, and so constructed as to send out leaves of beautiful emerald green from every point.

They grow rapidly and make handsome ornaments for the home, conservatory or greenhouse.

Directions.—Place in water for several hours and then suspend in any desired position; repeat every two days until growth has started, after which water occasionally as required, being careful that it does not become dry. The greater the growth the more water will be required to keep the ferns in a flourishing condition. To use the fern dish cut ball in halves, placing flat side down, thus getting two dishes of beautiful ferns. They may be allowed to dry up at any time and be set away, and started again by watering it as before.

These designs will be from one to four weeks in starting, according to degree of heat and moisture. Do not expose to direct rays of sun. All designs shipped in the dormant condition.
